

PHETE SIG Report 2023

Submitted by LeAnne Petherick

The PHETE SIG has three sessions this Congress. There were nine submissions for the SIG and eight were accepted. Our membership continues to be low but seems to have a few people who maintain their membership but do not attend the Congress. Those attending the Congress seem to be consistent with paper submissions. Professors seem to present with graduate students thus some membership growth is occurring.

The PHETE AGM will address issues of how to sustain and grow our membership.

Below is the budget as shared with my by Tim Howard.
